

## **Problem**

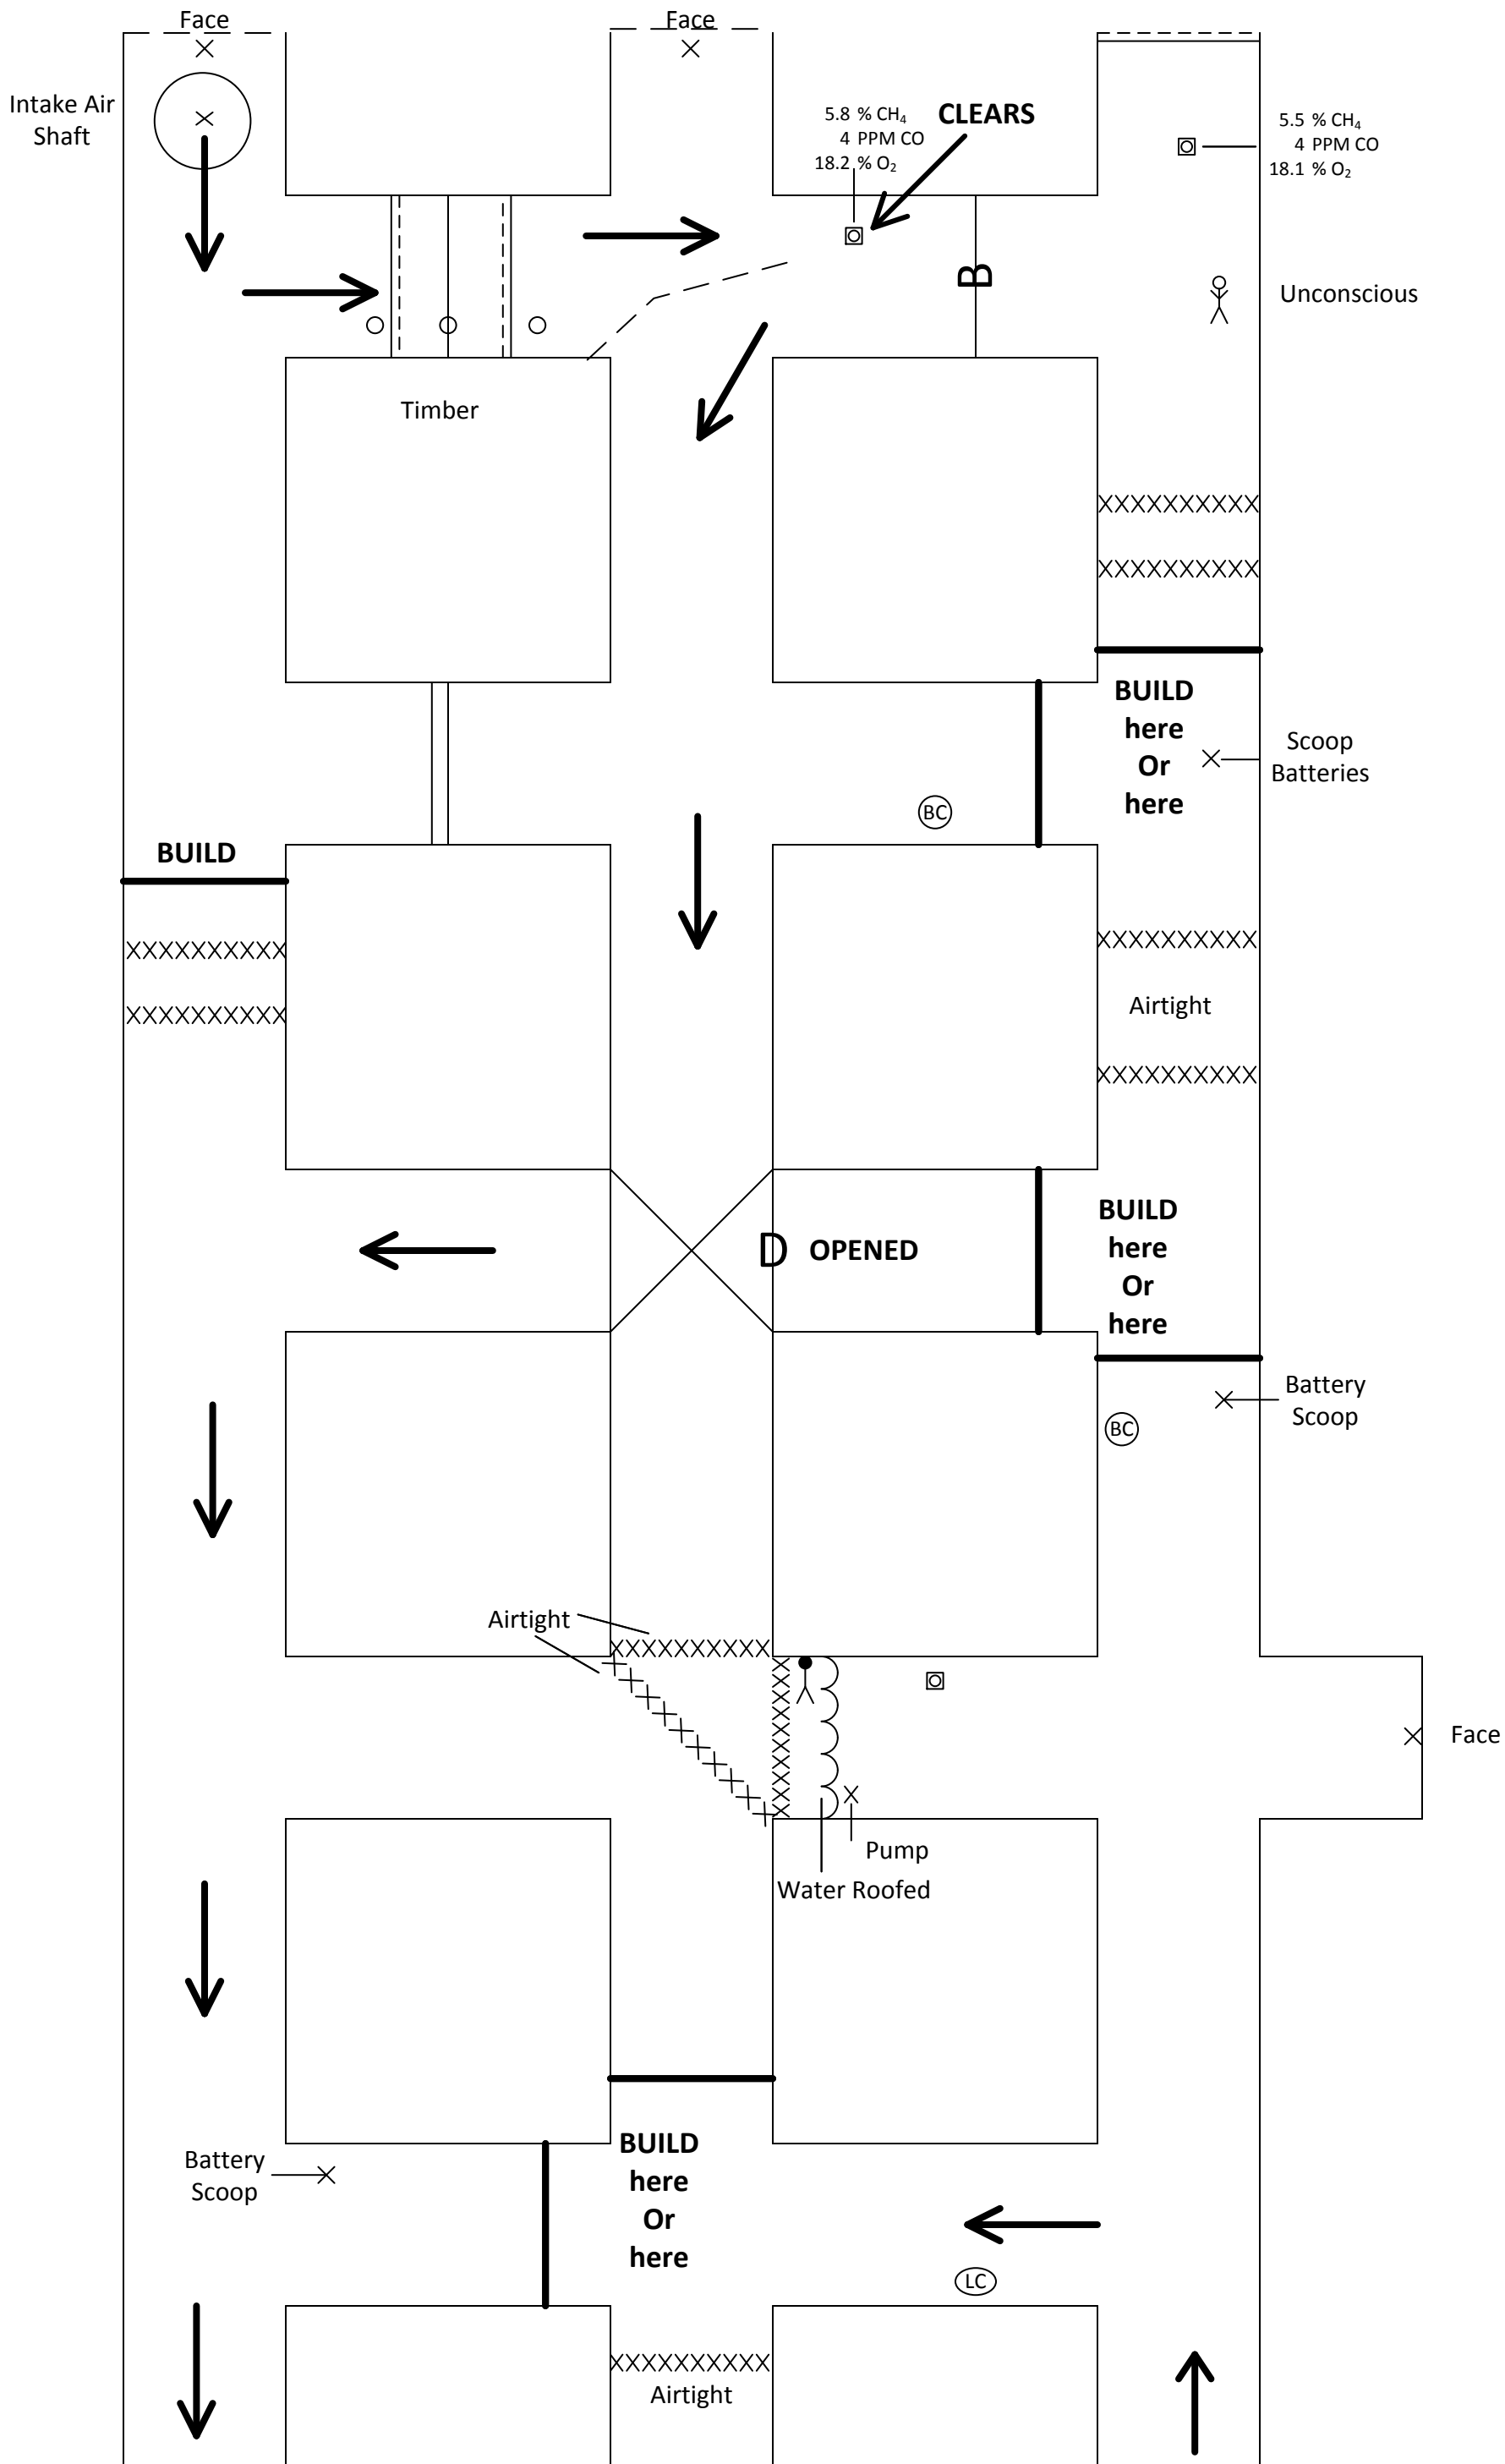

- Explore the entire mines
- Account for the four missing miners. Bring all survivors to the fresh-air base
- The Exhaust Fan is located outby off the #1 Entry and cannot be stalled, stopped or reversed
- The Air Shaft is located on the top end of #1 Heading. The shaft was examined on the surface and the cap on the shaft has been dislodged and air is entering the Intake Shaft.
- There is a pump located underground that the power is currently being worked on. There is no power on the pump. The team will be notified when the power can be restored to the pump.
- Mine map is not up-to-date
