2017
KMI-KENTUCKY STATE
MINE RESCUE CONTEST
DAY 1
KMI/KENTUCKY STATE MINE RESCUE CONTEST
SUPERINTENDENT STATEMENT DAY 1 & 2
AUGUST 23 & 24, 2017

Thank you for coming to help us. You are located the fresh air base of the Lex-Co #1 mine.

A mine rescue team was able to explore and set up the fresh air base. There is an outby fan and a safe intake and return that can be used for ventilation outby the fresh air base.

There is a divided shaft in the last open crosscut that is safe to use either side to ventilate through and a fan is installed at the top of the intake shaft.

There are airlocks built inby the fresh air base and must be maintained to prevent unattended ventilation through the mine. If running, either fan will ventilate through the area if not blocked.

The mine has a history of bad roof, water and methane. The mine maps are up to date. We have a competent life line person to give and take life line signals if necessary.

When the team is traveling they can only carry 1 timber per working team member and they must carry their own timber in their hand. Brattice cloth and line curtain must be either carried in the hand or on the stretcher. No throwing, kicking, pitching etc. of timbers, water pump, brattice cloth or line curtains by the team members.

Thank you and good luck.
PROBLEM DAY 1

THE OUTBY FAN VENTILATING THE FRESH AIR BASE IS EXHAUSTING ONLY AND CAN NOT BE SHUT OFF.
THE SHAFT FAN IS OFF AND CAN BE STARTED BLOWING OR EXHAUSTING AS NEEDED.
DO NOT STALL EITHER FAN, AS IT WILL CAUSE DAMAGE TO THEM.
TO PREVENT STALLING WHEN USING BOTH FANS THE OUTBY FAN HAS TO BE EXHAUSTING AND THE SHAFT FAN HAS TO BE BLOWING.
ACCOUNT FOR ALL 4 MISSING MINERS THAT ARE IN THE AREA YOU ARE EXPLORING AND BRING SURVIVORS TO THE FAB.
EXPLORE ALL AREAS OF THE MINE THAT CAN BE DONE SAFELY.
PATIENT STATEMENT 1

HELP!! GET ME OUT OF HERE.
PATIENT STATEMENT 2

HELP!! I WANT OUT OF HERE.
KMI/KENTUCKY STATE MINE RESCUE CONTEST DAY 1
JUDGES BRIEFING
Number 1 entry GT DI Airlock GT inby stopping DI
