Mine Rescue

Day #1

HARLAN SAFETY DAYS DAY 1

Thanks for responding to our call for help. Your located underground at the fresh air base of the Big Money Mines # 1 section. We had a 6 man crew enter the mines on 3rd shift to get ready for production on 1st shift. at 3:00 am the forman called out said they were having some problems and needed to speak to the 3rd Shift Foreman. We have not be able to contact anyone on the section since that time. The 3rd shift forman and

Out-by Maintence Chief made it almost to the section and encountered low O2 so they made a fresh air base were you are currently located. All power inby the fresh air base has been locked out . The mine fan is a blowing fan and running at this time. The intake goes up the #3 entry and returns out the #1 entry. Please help find our missing miners. The mine map is up to date. This is all the information I have at this time we have Federal and State teams here to serve as backup teams if needed. Thanks and good luck.

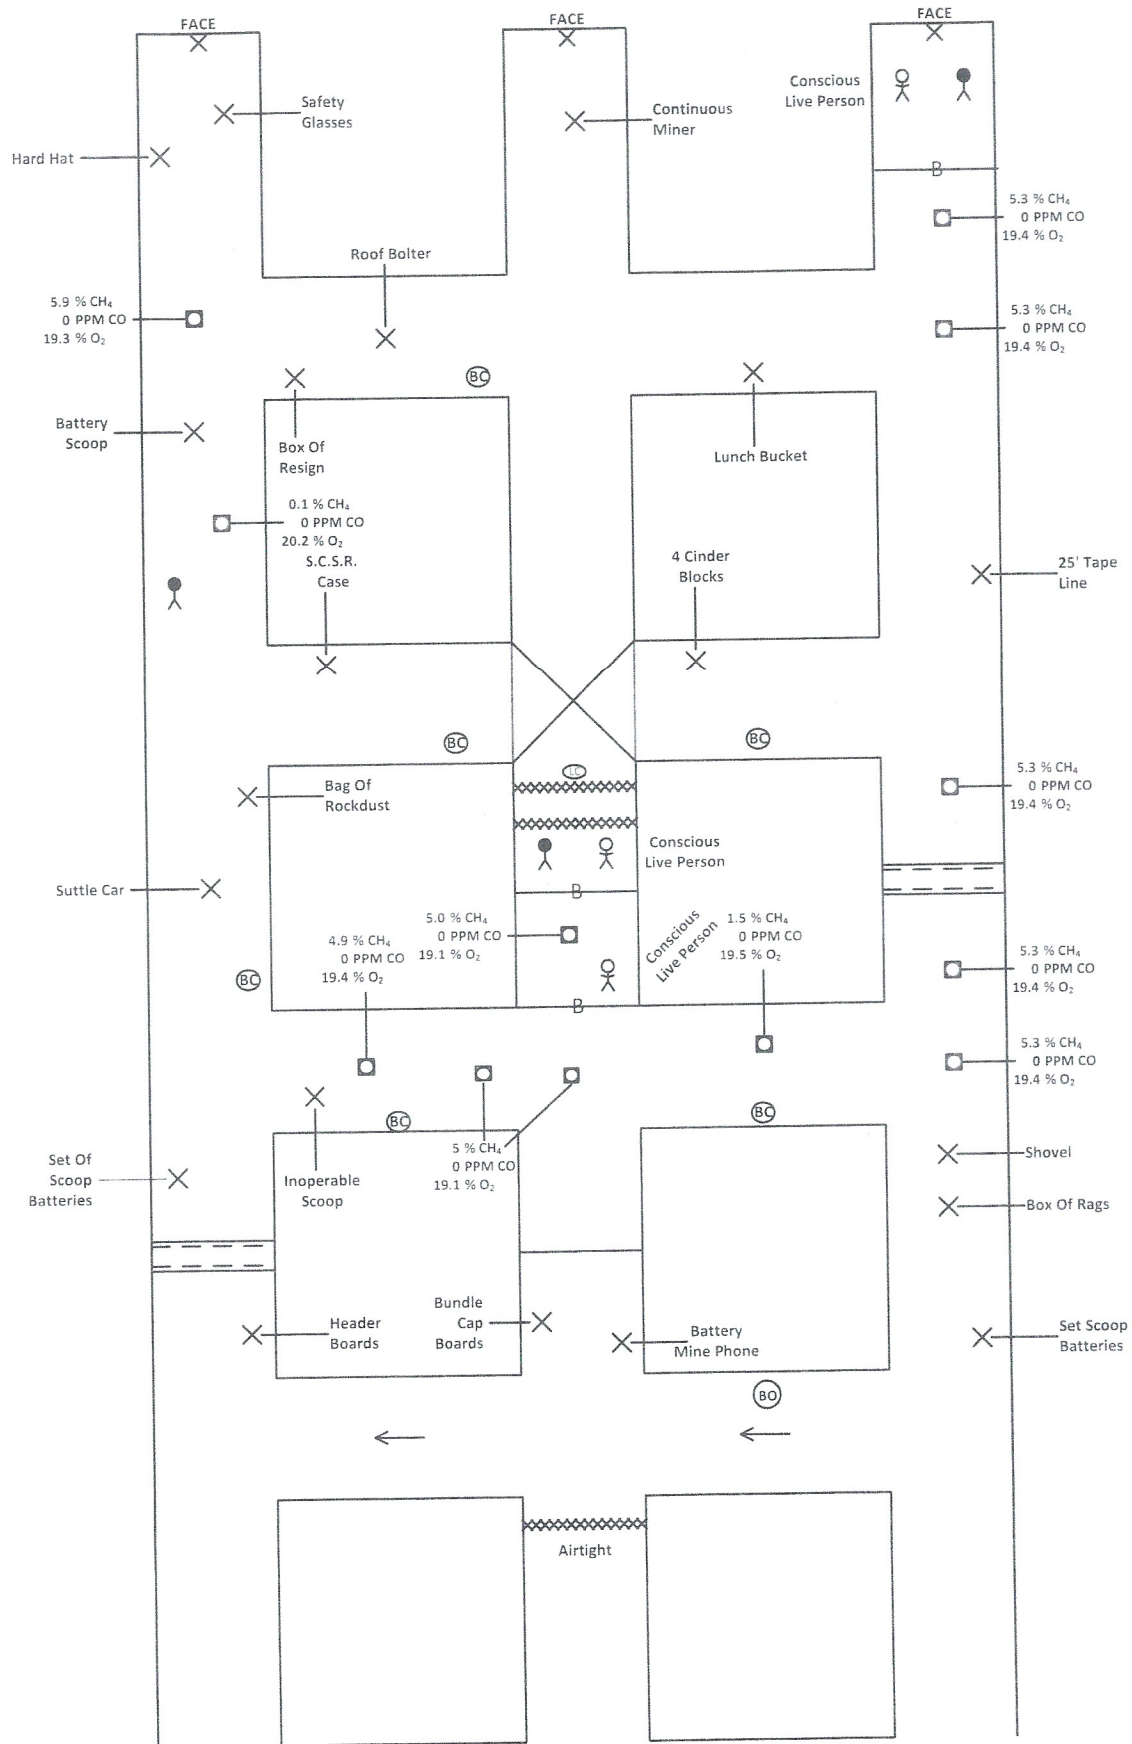

HARLAN SAFETY DAYS DAY 1 WRITTEN INSTRUCTIONS.

Explore entire mines if can be done safely.

Account for all missing miners and bring survivors to fresh air base.

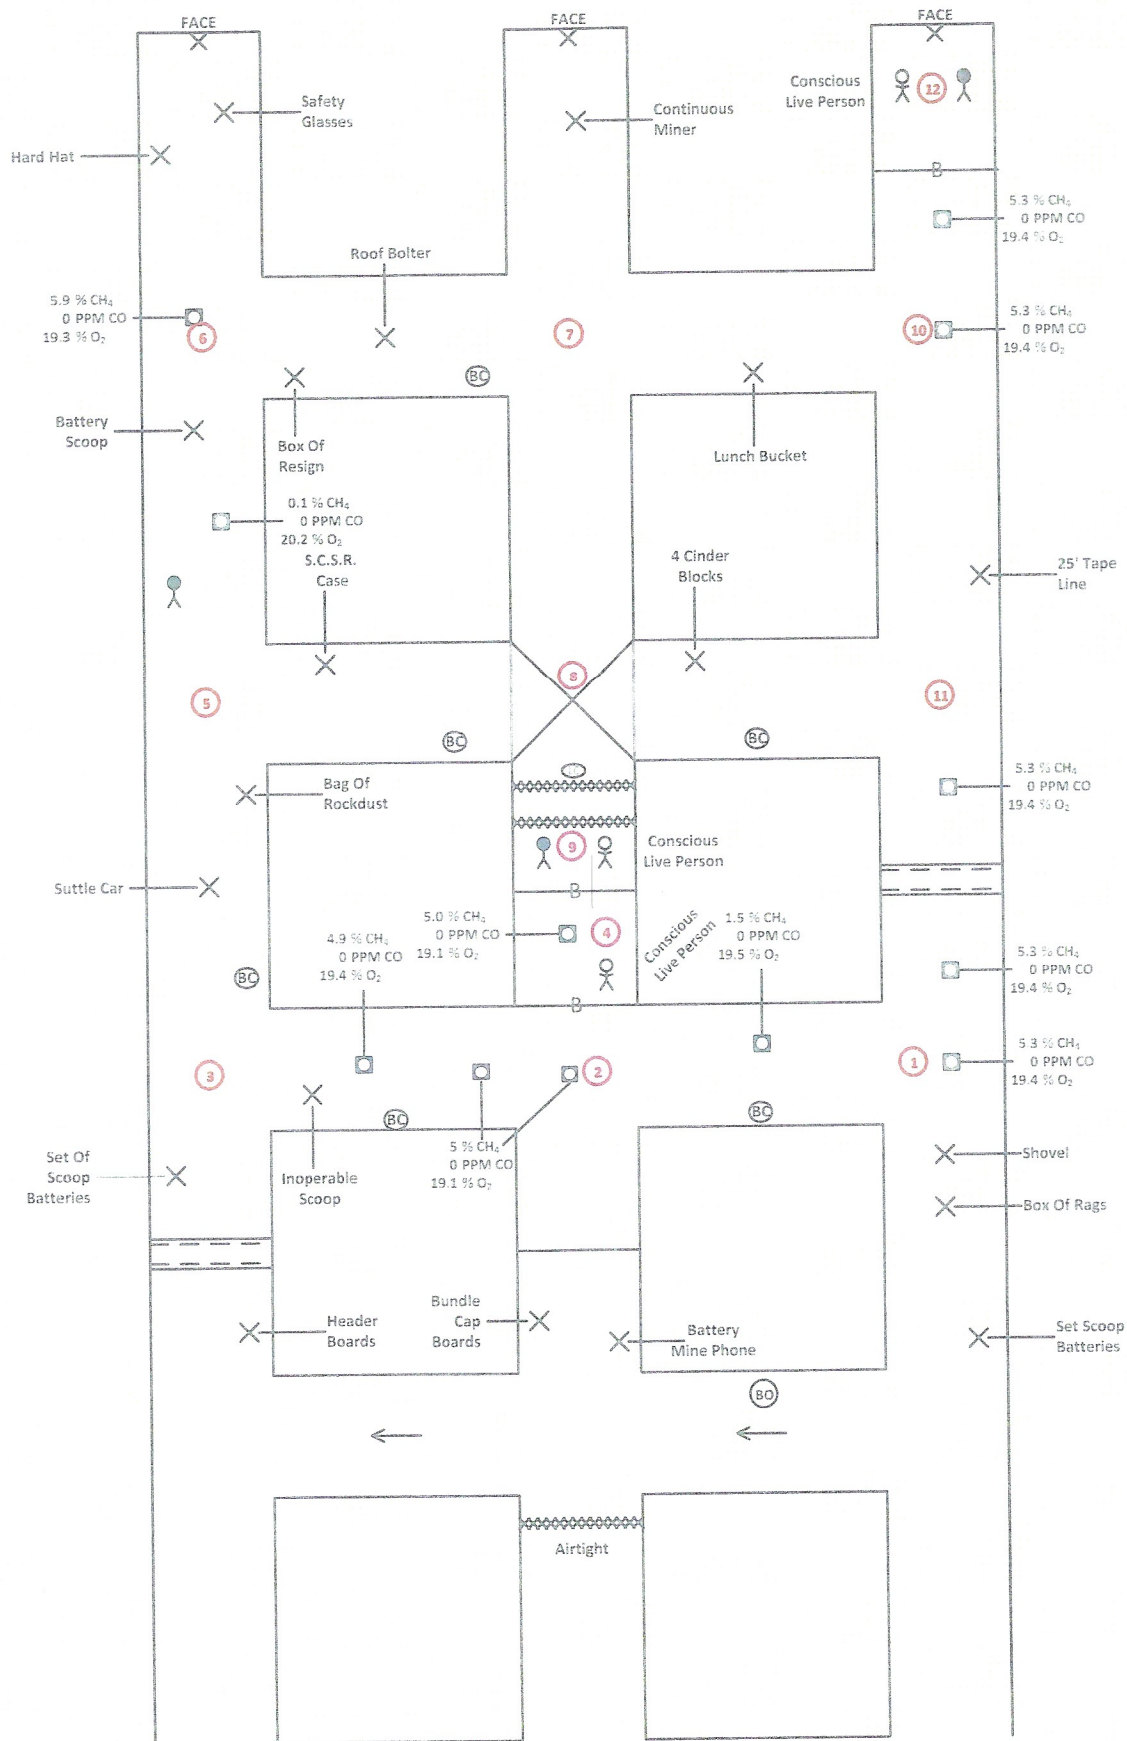

The blowing fan is running and cannot be stopped stalled or reversed.
