

## **2023 Loveland, COAL Day 2 Written Statement**

Thank you for responding to our mine emergency. You are located at the fresh air base on the South Mains Section. 4 miners failed to return to the surface this morning after working last night. We have not heard from them or been able to contact them using the pagers or radios.

The entries in this section are numbered from left to right, 1, 2 and 3.

The exhausting main mine fan on the surface is running, guarded and cannot be reversed or stopped.

At present, fresh air is moving across the fresh air base from 1 entry to 3 entry and out 3 entry.

Back up teams and all officials are on site.

The mine map we have for you is up to date.
