

2023 Craig, CO Day 2
Written Statement

Thank you for continuing to assist us during this emergency.

You are located at the new Fresh Air Base established in the 4 Left Section.

A Command Center has been established on the surface.

The 4 Left entries are numbered from left to right 1, 2 and 3.

As you know, yesterday, 4 missing miners were accounted for in this section. 3 are still missing. Last night teams advanced this FAB and removed seals in 1 and 3 entries but encountered conditions which didn't allow further exploration into 4 Left. There are 2 8 ft. air shafts inby this FAB. The return shaft has an exhausting fan on the surface with an automatic closing door that is closed when off, which can be started in the command center. Fresh air is coming into the FAB from the open air shaft just inby the FAB in 2 entry and the air splits and is returning out 1 and 3 entries outby. The

The EXHAUSTING main mine fan on the surface is running, is guarded and cannot be reversed. All power into the mine is locked out.

If power is required to energize any equipment in the mine, switches will be available at the command center.

The mine uses some battery powered haulage equipment.

All officials and backup teams are present.

The mine map is up to date.

Craig, CO 2023 Day 2
Written Problem

Explore the entire area to account for the 3 missing miners if it can be done safely and bring any live miners to the FAB.

Your Team can only carry 2 Timbers at any time.

Your Team has 90 Minutes to complete this assignment.
