## **Post 6 Day1**

Welcome to the Mole Hill Mine and thank you for answering our call for help. We had a 9 person production crew go in on afternoon shift to finish mining on the 1 Right section. The fire boss headed in, but could not make it to the section because a rush of dust headed towards him, so he headed outside. On the way out he saw two miners coming out of the intake and the fireboss helped them get to the surface. Once outside he called me to give an update. I advised him to try and contact the section. We currently have not heard from anyone on the section. The miners were telling us that they had discovered methane on the section and had started out so they could bring up extra curtain to help ventilate the section. They heard a loud rumble and dust started coming towards them. They headed into the intake at that time and that was all they knew.

We have a well- equipped and trained mine rescue team to serve as your back up while you are underground. The exhausting fan is currently off, all power is off to the section and the maps have not been updated since the last shift. We have had trouble with the roof and gas on this section in the past. #1 is the intake and #2and #3 entries are the return. There is a small caved area in #3 entry that we found when we set up the fresh air base but it did not stop the team travel so we timbered around the unexplored area.

Please help find our missing miners and good luck

# ***Problem***

***BRING ALL SURVIVORS OUT***

***THE FAN CAN BE STARTED OR STOPPED AT  
YOUR REQUEST OF THE BRIEFING OFFICER  
TO THE SUPERINTENDENT. THE FAN CAN  
NOT BE STALLED OR REVERSED***

***TEAM CAN ONLY CARRY TWO BUILDS AT  
ONE TIME***

***EXPLORE ALL AREAS THAT CAN BE  
EXPLORED SAFELY***

***ACCOUNT FOR ALL MISSING PERSONS***

***YOU HAVE 75 MINUTES TO  
COMPLETE THE PROBLEM***
