

## 2024 Craig, CO Day 2

### Written Statement

Thank you for coming to assist us during this emergency.

You are located in the Fresh Air Base established in the 3 Right Section.

A Command Center has been established on the surface.

The 3 Right entries are numbered from left to right 1, 2 and 3. Air is moving across the FAB from right to left, or from 3 entry to 1 entry then out.

Last night 4 miners were working in this section. 2 brought out the trip for the oncoming crew and dispatch got a radio call from one of the miners left in the section that they had to barricade. There has been no further contact with either of these miners.

The EXHAUSTING main mine fan on the surface is running, is guarded and cannot be reversed. All power into the mine is locked out. If power is required to energize any equipment in the mine, switches will be available at the command center.

The mine uses some battery powered haulage equipment.

All officials and backup teams are present.

The mine map we have for you is up to date.
