## **2025 Harlan Co. Safety Days**

### **Day 1**

**Thanks for responding to our call for help. You are located at the Dig Deep #1 mine in the fresh air base. We had a six-man crew enter the mines at 12am to get section ready for coal production at 7am. At 2am one of the crew called out and needed the foreman to come to the section they have a problem. When the foreman reached the section, he was unable to contact the crew due to bad top and low O2, so he set up a fresh air base. The fan at our mine is blowing fan that intakes up the #2 entry and returns out the # 1 and #3 entries. All power in by the fresh air base has been turned off. There is an air shaft in the face of the #3 entry that can be used if needed to ventilate the section. All state and federal agencies have been notified and we have back up mine rescue teams on scene. That is all the information we have currently please help find our missing miners. Good Luck**

**2025 Harlan Co. Safety Day  
Day 1 Instructions.**

**Explore all areas of the mine that can be done safely.**

**Account for all missing miners, Bring survivors to the fresh air base.**

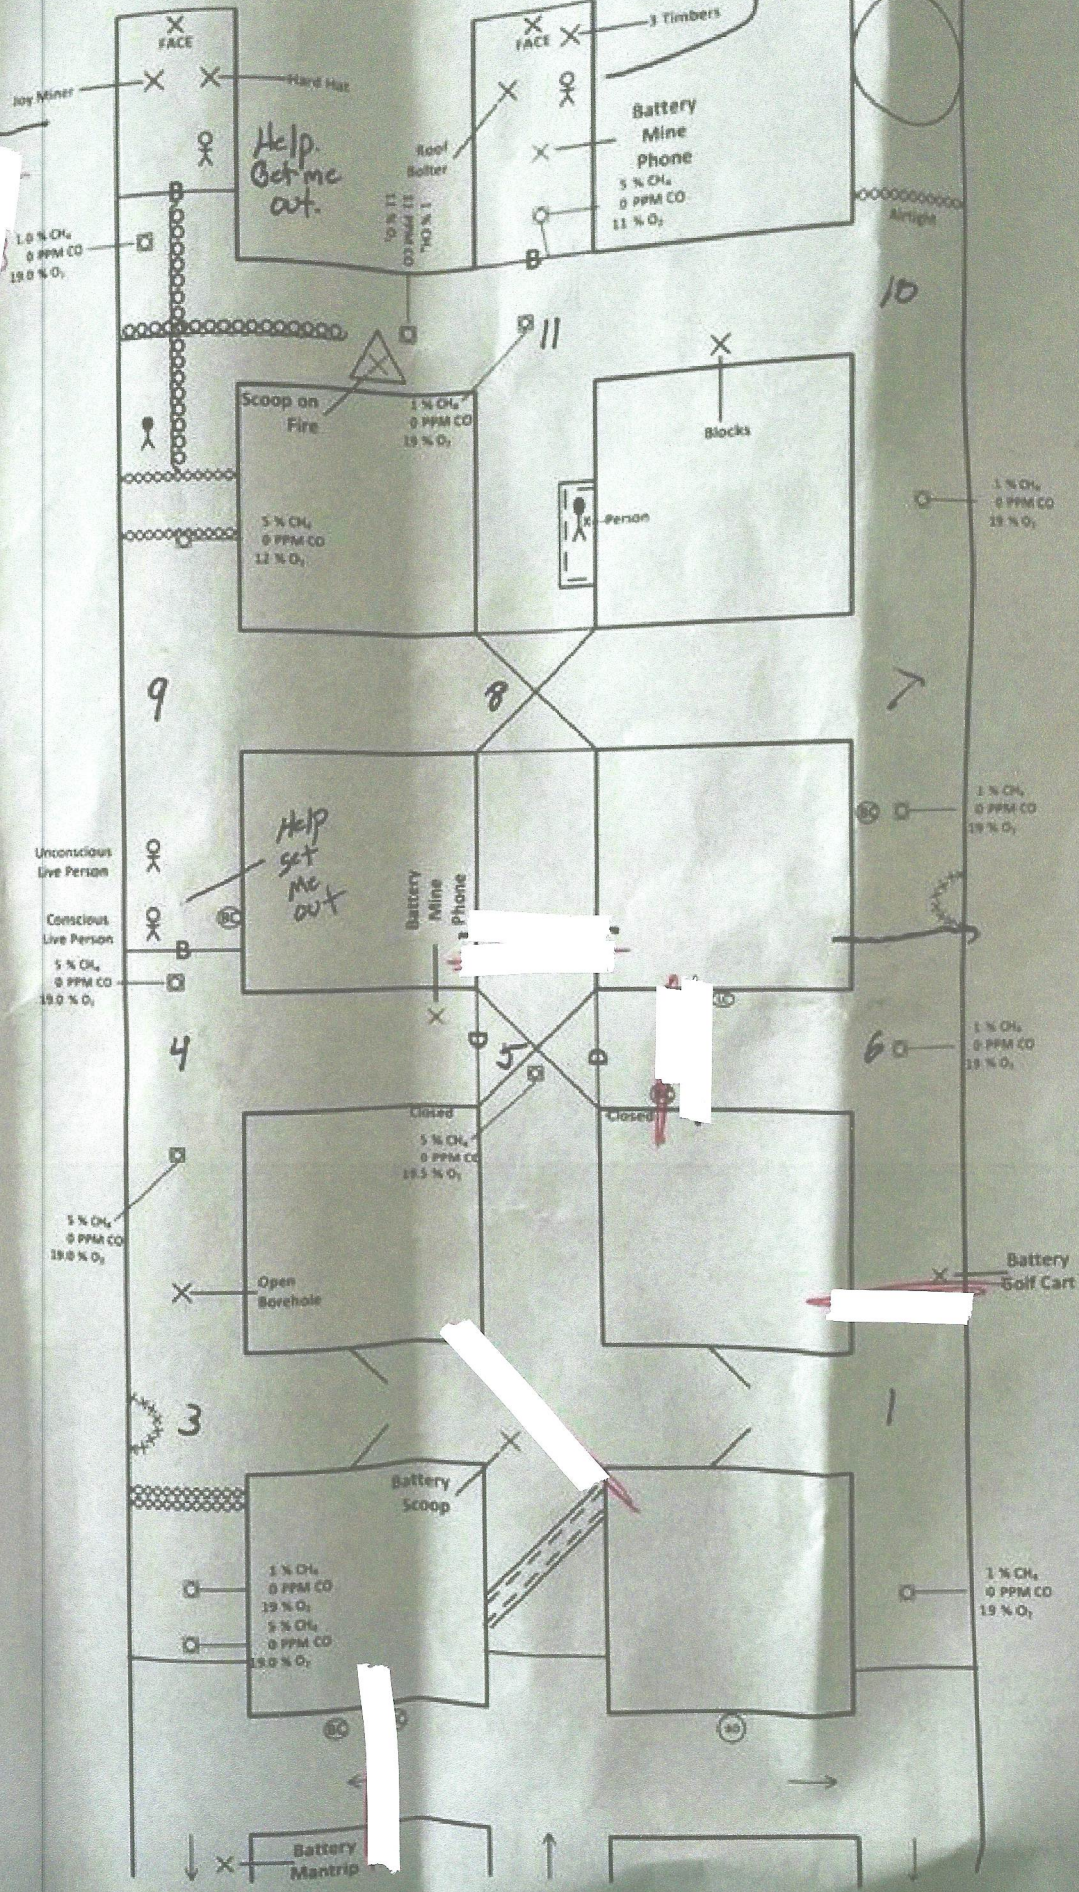

**The mine fan is blowing cannot be stopped, stalled or reversed.**

**Team may only carry 4 sets of building material while traveling.**

**The mine map is not up to date.**
