

## Price Utah 2025 Day 2

### Written Problem

Explore the entire mine to account for the 6 missing persons if it can be done safely and bring any live persons to the FAB on the surface.

If your team chooses to use the auxiliary face fan for ventilation, you must place it in the permanent stopping in 1 entry just inby the #1 portal.

Teams can only carry materials to pump water, build stoppings, or support roof individually. Teams cannot carry timber, stopping material or pump supplies together.

The auxiliary fan has 50 ft. of cable directly wired to the diesel generator/compressor.

The diesel generator/compressor is stationary.
