

# PREPARE FOR THE WORST BY SELECTING THE BEST.

You can't go wrong with the best. No emergency response plan is complete without the StatBand® line of emergency response wristband tags.

The StatBand line has become the preferred choice of emergency response teams across the country due to the following unique features:

- Advanced water and abrasive-resistant 3-ply polymer construction to withstand the harsh conditions of an emergency response environment far better than traditional paper and string tags.
- Patented one piece fastening system that ensures wristband tags go on quickly and stay on until they are no longer needed.
- Self-adhesive uniquely numbered barcode labels for quick and accurate identification and tracking of people, pets, and personal belongings.
- Bundled in groups of 25 to an easy clip-on belt fastener that allows first responders both hands free to do their jobs.

Best of all, we can develop surprisingly affordable made-to-order StatBand products to meet your specific needs. From design to finished product, we can supply your made-to-order product in as little as 12 weeks, providing benefits such as:

- Personalized colors, specific identification numbers, and your organization names.
- Triage steps specific to your organization.
- The exact number of removable peel and stick barcode labels you require.
- An experienced partner to assist in identification initiatives.

## EVACUATION WRISTBANDS

Easily identifiable orange, laminated band. Created to help keep track of families in case of separation during an emergency evacuation. Includes a "reuniting" space for barcode labels from relatives as well as pets and other important possessions.

## TRIAGE WRISTBAND TAGS

Designed so first responders can quickly and accurately identify, record and track the injured at the scene of an emergency. Tested by the FBI and other emergency agencies. The all-in-one preprinted barcode labels are ideal for use with disaster management software.

## RAPID ID WRISTBAND TAGS

Ideal for everyday emergency response where pre-printed and uniquely numbered barcode labels help caregivers identify and track patients, belongings and other related information. Durable all-in-one wristband construction is perfect for withstanding the harsh elements of emergency situations.

## EMS WRISTBAND TAGS

This flexible design can be used as a triage tag, while the color coded identifiers can be removed for everyday use to enable first responders to quickly and accurately identify, record, and track the injured.

Select from our existing product line or let us help you create a made-to-order product that works specifically for you and your communities. Visit us at [www.StatBand.com](http://www.StatBand.com) or call 1-800-238-0870 to learn more.

We're looking forward to helping you prepare for the worst by offering you the best.  
StatBand - the world's most advanced emergency response wristband tags.
