

Drone Safety Awareness

Keep it in sight!

You should stay below

400ft

You must keep your drone in sight at all times.

It's illegal to fly "first person view" (using goggles or solely by reference to a screen) on your own, there are special rules you need to follow

Don't fly a toy, be a

Modern drones weighing more than 500g are sophisticated and powerful pieces of technology. They can do cool things, and are great fun, but they aren't toys.

Start seeing yourself as a drone pilot in order to have fun and stay safe and legal.

Do your checks!

Just like pilots of full-scale aircraft, do your pre-flight checks.

By taking responsibility and **flying legally & safely** you will help the public perception of drone flying.

KEEP US ALL FLYING!

It's your responsibility to keep out of the way!

Keep a lookout & listen... for other aircraft when you fly

You're in control!

It's your responsibility to make sure you know the law regarding drones in the UK

Don't fly near airports!

It's a criminal offence to endanger any other aircraft. Stay well away from airports and airfields.

Keep your distance! | 150m

It's illegal to fly your camera drone over or within **150m** of a built-up area

In addition to this rule:

It's **illegal** to fly near or over large groups of people, and **illegal** to fly your camera drone within **50m** of any person, vehicle, building or structure not under your control.

50m

In association with:

NATS

Drone safety awareness weekend will be taking place at Farnborough International Airshow on 16th-17th July 2016

Farnborough
